Work Experience

EMPLOYER	**Google**	London, United Kingdom
PERIOD	**July 2017 — September 2017** (3 months)	
JOB TITLE	**Software Engineering Intern, Android UI Toolkit**	

Implemented a user-facing feature that will be present in the next release of Android - P.

EMPLOYER	**JustUpped**	Zagreb, Croatia (remote)
PERIOD	**January 2017 — June 2017** (6 months)	Munich, Germany
JOB TITLE	**Android Team Lead**	

Architected and worked on the Android client for a new real-time social network and helped interview, hire and onboard new members as well as provide them with technical guidance.

EMPLOYER	**Microsoft**	Dublin, Ireland
PERIOD	**July 2016 — October 2016** (3 months)	
JOB TITLE	**Software Engineering Intern, Office Marketplace Experience**	

Supported the migration between two build systems by making sure existing test automation continued to work by analyzing, debugging and improving existing solutions.

EMPLOYER	**CROZ d.o.o.**	Zagreb, Croatia
PERIOD	**June 2012 — June 2016** (4 years)	
JOB TITLE	**Software, tools, architecture and integration consultant**	

Worked on various aspects (front end, back end, mobile) of projects of all sizes and gained experience in building and integrating larger systems, as well as leading smaller teams and projects.

Selected Projects And Talks

European Universities Games 2016 Mobile Applications
My responsibilities included architecting, developing and supporting the native Android application as well as integrating our back end solution with the official EUG website.

Tour of Croatia 2016 Mobile Applications
Led the team that developed the native iOS and Android companion applications for the Tour of Croatia 2016. My responsibilities included designing the API which powered the apps, designing the application flows and architecting and developing the Android application.

American Express MyAccount
Led the team that developed the Android and Windows Phone versions of the MyAccount mobile application using Sencha Touch and Apache Cordova.

The highs and lows of Android app development with Xtend
Held a talk on the first Croatian droidcon (an international conference on Android development) about my experiences with developing Android applications with Xtend - an alternative language for developing on the JVM.
